

Level One Estate - Documentation

Section 1: Overview

Level One Estate is a premium luxury real estate website template built with Laravel 11 and Filament 3. It includes a complete admin panel, property management system, team management, services section, and contact form.

Features:

- Luxury responsive design
- Admin panel for content management
- Team member management
- Services management
- Property listings with multiple images
- Contact form with database storage
- SEO-friendly URLs
- Mobile optimized
- Featured properties section
- Filter properties by type

Tech Stack:

- Laravel 11
- Filament 3
- Tailwind CSS
- MySQL

- Alpine.js

Requirements:

- PHP 8.1+
- Composer
- Node.js 18+
- MySQL 5.7+

Section 2: Installation Guide

▼ Installation Steps

Step 1: Extract Files

Extract the zip file to your web directory:

- XAMPP: `C:\xampp\htdocs\`
- Laragon: `C:\laragon\www\`
- Manual: Any folder you choose

Step 2: Install Dependencies

Open terminal in the project folder:

```
composer install  
npm install
```

Step 3: Environment Configuration

```
copy .env.example .env  
php artisan key:generate
```

Step 4: Database Setup

Create a database. Then edit `.env` :

```
DB_CONNECTION=mysql
DB_HOST=127.0.0.1
DB_PORT=3306
DB_DATABASE=your_database
DB_USERNAME=root
DB_PASSWORD=yourpassword
```

Step 5: Run Migrations

```
php artisan migrate
```

Step 6: Create Admin User

```
php artisan make:filament-user
```

Enter: Name, Email, Password

Step 7: Create Storage Link

```
php artisan storage:link
```

Step 8: Compile Assets

Open second terminal:

```
npm run dev
```

Step 9: Start Server

First terminal:

```
php artisan serve --port=8000
```

Step 10: Access Website

- Frontend: <http://127.0.0.1:8000>

- Admin: <http://127.0.0.1:8000/admin>

Section 3: Admin Guide

Section 4: Customization Guide

Changing Colors

Edit `tailwind.config.js`:

```
colors: {  
  gold: '#C6A43F',  
  cream: '#FCF9F5',  
  charcoal: '#1A1A1A',  
}
```

Then run `npm run dev`

Changing Fonts

Edit `resources/views/layouts/app.blade.php`

Replace Google Fonts link and update CSS

Changing Logo

Edit `resources/views/layouts/app.blade.php`

Text logo: Change "LEVEL ONE"

Image logo:

```

```

Changing Hero Images

Each page has its own hero background:

- Home: `resources/views/home.blade.php`
- About: `resources/views/about.blade.php`
- Services: `resources/views/services.blade.php`
- Team: `resources/views/team.blade.php`
- Properties: `resources/views/properties/index.blade.php`

Find `style="background-image: url('...')"` and replace the URL

Changing Contact Info

Edit `resources/views/contact.blade.php`

Update address, phone, email, hours, Google Maps iframe

Section 5: Deployment Guide

Shared Hosting (cPanel)

1. Run `npm run build`
2. Zip files (exclude node_modules)
3. Upload to public_html and extract
4. Create database, update `.env`
5. Run via Terminal:

```
php artisan migrate  
php artisan storage:link
```

```
php artisan config:cache
```

6. Set document root to `public` folder

VPS (DigitalOcean, Linode, AWS)

1. Connect: `ssh root@your-server-ip`
2. Install: `apt install nginx mysql-server php8.2 php8.2-fpm composer`
3. Upload files to `/var/www/levelone`
4. Run `composer install --no-dev`
5. Set permissions: `chown -R www-data:www-data`
6. Configure Nginx
7. Set up SSL: `certbot --nginx -d yourdomain.com`

Production .env settings

```
APP_ENV=production
APP_DEBUG=false
APP_URL=https://yourdomain.com
```

Section 6: Troubleshooting

Admin panel 404 error:

```
php artisan route:clear
php artisan config:clear
```

Images not displaying:

```
php artisan storage:link
```

Vite issues:

```
rm -rf node_modules  
npm install  
npm run dev
```

Port already in use:

```
php artisan serve --port=9000
```

Section 7: Support

For questions or customizations, contact the developer.
